Business, in the company's words

opening of Item 1 of the 10-K received Sep 23, 2025

Palatin? is a biopharmaceutical company developing first-in-class medicines based on molecules that modulate the activity of the melanocortin receptor ("MCR") system. Our product candidates are targeted, receptor-specific therapeutics for the treatment of diseases with significant unmet medical need and commercial potential. Palatin's strategy is to develop products and then form marketing collaborations with industry leaders to maximize product commercial potential. The MCR system has effects on inflammation and immune system response, food intake, metabolism, and sexual function. There are five melanocortin receptors, MC1R through MC5R.
