## Business, in the company's words

*opening of Item 1 of the 10-K received Feb 11, 2026*

The ability to accurately measure and reference time has been essential to humankind's greatest inventions and technological advances. Timing technology has continued to evolve over centuries, underpinning broader technological evolution and is the heartbeat of digital electronic systems. Timing ensures that the system runs smoothly and reliably by providing and distributing clock signals to various critical components such as central processing units, communication and interface ICs, and radio frequency components.
