Sector percentile at each rescan, stronger toward the top; facts filed by each date only.

Business, in the company's words

opening of Item 1 of the 10-K received Apr 15, 2026

We are a nuclear energy technology company developing a small modular reactor ("SMR") based on established pressurized water reactor ("PWR") technology, with novel emplacement in deep boreholes approximately one mile below the Earth's surface. Our reactor, which we refer to as the Gravity Reactor, will leverage subsurface conditions to support key containment and operating functions, including the use of hydrostatic pressure from a water column within the borehole to support reactor operating pressure and cooling, and the surrounding geological formation to provide structural confinement and shielding.
