Business, in the company's words

opening of Item 1 of the 10-K received Apr 10, 2026

We are a biotechnology company and, prior to the completion of our NEAT Phase 3 trial, described below, focused our development activities on unlocking the power of a patient's own biology for the treatment of rare diseases. Our proprietary AIDE technology platform is an innovative drug/device combination that uses an automated process designed to encapsulate a drug into the patient's own red blood cells. Red blood cells have several characteristics that make them an excellent vehicle for drug delivery, potentially including better safety and tolerability, enhanced tissue biodistribution, reduced immunogenicity, and prolongation of circulating half-life.
