Business, in the company's words

opening of Item 1 of the 10-K received Mar 2, 2026

computational performance in information processing. The recent emergence of artificial intelligence ("AI"), large language models ("LLMs"), and machine learning ("ML") algorithms has added to the need for efficient processing of vast volumes of data. Classical computers, or the computers that are currently used in home and office settings, that use silicon microprocessors are understood to have performance limitations in solving certain classes of computational problems, in particular, large-scale optimization problems. Optimization deals with finding the best solution to a problem according to a defined criteria from a set of possible solutions.
