Business, in the company's words

opening of Item 1 of the 10-K received Mar 26, 2026

company focused on developing therapies for the treatment of high impact, difficult to treat cancers through the inhibition of glycogen synthase kinase-3 ("GSK-3"). We are developing elraglusib, an ATP-competitive small molecule that is designed to enter cancer cells and block the function of the enzyme glycogen synthase kinase-3 beta ("GSK-3?"), a master regulator of complex biological signaling cascades, including those mediated by oncogenes, that lead to tumor cell survival, growth, migration, and invasion. We believe that the blockade of GSK-3? signaling ultimately results in the death of the cancer cells and the regulation of anti-tumor immunity.
