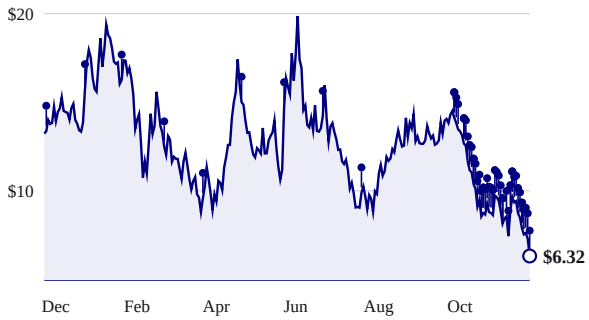
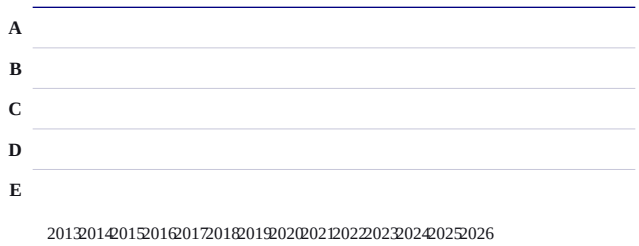
Share price, twelve months to the rescan



Split-adjusted close. Each lollipop is a rescan and carries the letter held then.

Letter at every rescan, 2012 to 2026



Sector percentile at each rescan, stronger toward the top; facts filed by each date only.

Business, in the company's words

opening of Item 1 of the 10-K received Mar 31, 2026

As used in this Item 1, unless the context indicates or otherwise requires, the following terms have the following meanings: "coherence" refers to the ability of a quantum system to maintain a well-defined phase relationship between different states in a superposition (when qubits are in multiple states at the same time). "contextual machine learning" or "CML" refers to techniques that enable machine learning models to process large amounts of data simultaneously. "entanglement" refers to a fundamental phenomenon where two or more quantum bits (qubits) become interconnected and instantly correlated with the state of each other, regardless of the distance between them.

The thirteen inputs

lower percentile is stronger; sleeves and inputs within a sleeve carry equal weight
