Sector percentile at each rescan, stronger toward the top; facts filed by each date only.

Business, in the company's words

opening of Item 1 of the 10-K received Mar 31, 2026

We are a preclinical-stage biopharmaceutical company focused on the development of novel, orally administered small-molecule therapeutics for obesity and related metabolic disorders, such as metabolic dysfunction-associated steatotic liver disease (MASLD, a type of fatty liver disease). The program aims to develop a differentiated, non-hormonal, non-incretin approach, unlike hormone-based treatments like GLP-1 drugs. On March 2, 2026, we announced positive preclinical proof-of-concept data for ALN1003 from two separate studies using a standard diet-induced obesity (DIO) mouse model in male C57BL/6 mice maintained on a high-fat diet (60% of calories from fat).
