Business, in the company's words

opening of Item 1 of the 10-K received Mar 12, 2026

Our mission is to harness the power of the immune system to improve lives and eradicate cancer. This often means that our product candidates take new and unproven approaches to treating cancer. We believe that taking smart risks is critical to making breakthroughs. Our pipeline candidates are built on our deep expertise in myeloid biology and cancer drug development. Our various approaches use pattern recognition receptors expressed by the innate immune system to help the body eliminate tumor cells as part of a productive anti-cancer response.
