Business, in the company's words

opening of Item 1 of the 10-K received Mar 19, 2026

is a late clinical-stage biopharmaceutical company focused on developing next-generation oncolytic viral immunotherapies for patients suffering from aggressive and/or difficult-to-treat tumor types. Our clinical and preclinical product candidates are intended to selectively kill tumor cells and induce a robust immune response against a patient's tumor neoantigens. Importantly, our oncolytic immunotherapy product candidates are "off-the-shelf" personalized immunotherapies. In other words, while we administer the same virus product to different patients, the cellular immune response generated is expected to be specific to the unique neoantigens in that patient.
