Business, in the company's words

opening of Item 1 of the 10-K received Mar 23, 2026

Planet's mission is to use space to help life on Earth, by imaging the world every day and making global change visible, accessible, and actionable. We have designed, built, launched, and operated hundreds of satellites used to collect a powerful and growing data set of over 3,000 images on average for every point on Earth's landmass, creating a non-replicable historical archive for analytics, machine learning, and insights. Complementing our foundational data offerings, we have advanced data processing capabilities that enable us to produce "AI-ready" data sets and offer AI-enabled solutions, either directly or through partnership with third parties.
