Business, in the company's words

opening of Item 1 of the 10-K received Dec 4, 2025

We are a leading global provider of biological and chemical compound sample exploration and management solutions for the life sciences industry. We entered the life sciences market in 2011, leveraging our in-house precision automation and cryogenics capabilities that we were then applying in the semiconductor manufacturing market. This led us to develop and provide solutions for automated ultra-cold storage. Since then, we have expanded our life sciences offerings through internal investments and through a series of acquisitions.
