Business, in the company's words

opening of Item 1 of the 10-K received Mar 13, 2026

We are a clinical-stage biotechnology company developing treatments for age-related brain disorders. Our lead drug candidate, neflamapimod, is an investigational, orally administered small-molecule drug that readily crosses the blood brain barrier and selectively inhibits the enzyme p38?, a key driver of neuroinflammation and synaptic dysfunction. By targeting the critical disease processes underlying degenerative disorders of the brain, neflamapimod has the potential to reverse synaptic dysfunction, improve neuron health, and slow or prevent disease progression. Neflamapimod is currently in clinical development for the treatment of DLB, our lead indication, as well as nfvPPA, RAS, and ALS.
