Business, in the company's words

opening of Item 1 of the 10-K received Mar 16, 2026

We are a radiopharmaceutical development company pioneering advanced treatments for cancers throughout the body. We have proprietary technology that utilizes the alpha-emitting isotope Lead-212 (212Pb) to deliver powerful radiation specifically to cancer cells via specialized targeting moieties. We are also developing complementary imaging diagnostics that incorporate the same targeting moieties, which provides the opportunity to personalize treatment and optimize patient outcomes. This theranostic approach enables the ability to see the specific tumor and then treat it to potentially improve efficacy and minimize toxicity.
