Business, in the company's words

opening of Item 1 of the 10-K received Mar 18, 2026

We provide software and artificial intelligence ("AI") designed to deliver a more accurate and clinically effective non-invasive solution for diagnosing and managing coronary artery disease ("CAD"), a leading cause of death worldwide. As of December 31, 2025, our Heartflow Platform has been used to assess CAD in more than 600,000 patients, including 219,000 in 2025 alone. We believe that we are the most widely adopted AI-powered test for CAD.
