*Sector percentile at each rescan, stronger toward the top; facts filed by each date only.*

## Business, in the company's words

*opening of Item 1 of the 10-K received Mar 18, 2026*

leverages Magnetic Resonance Spectroscopy ("MRS"), and proprietary biomarkers to optimize clinical treatments. Aclarion's technology addresses the $134.5B U.S. low back and neck pain market, which according to a 2020 JAMA (Journal of the American Medical Association) article is now the most costly healthcare condition in the United States. The Company is currently utilizing Artificial Intelligence ("AI") to assist in quality control processes that flag spectroscopy data indicative of a poor MRS study. The use of AI in this application is early in its development cycle and is expected to evolve with further research and development.
