Sector percentile at each rescan, stronger toward the top; facts filed by each date only.

Business, in the company's words

opening of Item 1 of the 10-K received Mar 5, 2026

We are an in vivo genome editing company capitalizing on our proprietary technologies to create curative genetic medicines for patients. We were founded on the science of metagenomics, the study of genetic materials recovered from the natural environment, to discover and develop a suite of novel gene editing tools potentially capable of correcting any type of genetic mutation found anywhere in the human genome. We leverage machine learning and artificial intelligence to enhance our signature gene editing systems.
