Business, in the company's words

opening of Item 1 of the 10-K received Mar 18, 2026

We are a late-clinical-stage biotechnology company pioneering the development of a first-in-class, autologous cell therapy that is intended to preserve kidney function in patients with advanced chronic kidney disease ("CKD") and diabetes. Our approach seeks to redefine the treatment of CKD, shifting the emphasis away from management of kidney failure to the preservation of kidney function. Our lead product candidate, rilparencel, is the only cell therapy in Phase 3 clinical study for the treatment of advanced CKD and type 2 diabetes. Rilparencel is a product that includes autologous Selected Renal Cells ("SRC") prepared from a patient's own (autologous) kidney cells.
