Business, in the company's words

opening of Item 1 of the 10-K received Mar 2, 2026

We are a clinical-stage biotechnology company focused on developing next-generation precision medicines for large opportunities in targeted oncology and genetically defined conditions, harnessing the power of Fibroblast Growth Factor Receptor (FGFR) biology. Our in-house precision medicine platform, SNÅP, enables rapid and precise drug design through iterative molecular SNÅPshots that help us design and predict which product candidates may demonstrate the highest potency, selectivity and tolerability in the clinic. Through this approach, we have built a wholly-owned pipeline of oral small molecule product candidates focused on targets that have previously been considered difficult-to-drug.
