## Business, in the company's words

*opening of Item 1 of the 10-K received Mar 12, 2026*

We are a clinical stage biopharmaceutical company developing product candidates that precisely target proteins that are critical to immune cell maturation and function. We believe our proprietary product candidates have broad potential to address immune mediated diseases, inflammatory diseases and cancers. Our lead product candidate, soquelitinib (formerly CPI-818), is designed to bind specifically to a protein, interleukin 2 inducible T cell kinase (ITK), involved in T cell activation, T cell receptor signaling and T cell differentiation and function.
