Business, in the company's words

opening of Item 1 of the 10-K received Mar 2, 2026

We are building the first and only global Cellular Broadband network in space to be accessible directly by everyday smartphones (2G/4G-LTE/5G devices) for commercial use, and for other applications for government use utilizing our extensive intellectual property ("IP") and patent portfolio. The SpaceMobile Service is being designed to provide cost-effective, high-speed Cellular Broadband services to end-users who are out of terrestrial cellular coverage using existing mobile devices. The SpaceMobile Service currently is planned to be provided by a constellation of high-powered, large phased-array satellites in LEO using low-band and mid-band spectrum controlled by MNOs.
