Business, in the company's words

opening of Item 1 of the 10-K received Mar 17, 2026

We are a clinical stage biopharmaceutical company dedicated to the development and commercialization of treatments for prevalent retinal diseases with major unmet medical needs. We are developing TH103, a novel, clinical stage anti-vascular endothelial growth factor ("VEGF") drug, specifically engineered to achieve extended intraocular retention with enhanced VEGF inhibition in patients with exudative and/or neovascular retinal diseases. TH103 is a fully humanized recombinant fusion protein, functioning as a "decoy receptor" (a VEGF trap), leveraging salient molecular properties of the human body's native, highest affinity VEGF receptor 1.
