?We build and deploy integrated condition monitoring and early threat detection solutions that connect multiple sensor types through a unified edge-to-cloud software architecture. Our software platform integrates multiple sensing modalities such as thermal, visual and acoustic, among others. Customers deploy the MSAI Connect platform to continuously monitor critical assets and identify early degradation patterns (such as elevated operating temperatures) across electrical, mechanical, and environmental systems. This allows teams to intervene early and convert potential failures into planned maintenance before downtime, safety incidents, or operational disruption occur.
