Business, in the company's words

opening of Item 1 of the 10-K received Feb 6, 2026

We design, develop and market analog and mixed-signal integrated circuits ("ICs") and other electronic components and circuitry used in high-voltage power conversion. Our products are used in power converters that convert electricity from a high-voltage source to the type of power required for a specified downstream use. In most cases, this conversion entails, among other functions, converting alternating current ("AC") to direct current ("DC") or vice versa, reducing or increasing the voltage, and regulating the output voltage and/or current according to the customer's specifications.
