Business, in the company's words

opening of Item 1 of the 10-K received Mar 24, 2026

We are a clinical-stage biopharmaceutical company developing therapeutic product candidates for metabolic diseases by targeting the biology of human aging. Our technology platform and differentiated human datasets enable us to identify promising targets based on insights into molecular changes that drive aging. In January 2025, we announced the nomination of our lead program, BGE-102, a potent, structurally novel, orally available, brain-penetrant small-molecule NLRP3 inhibitor. BGE-102 has a distinct mechanism and binding site from other NLRP3 inhibitors in development with issued patents covering both composition of matter and claims for the unique binding site.
