Business, in the company's words

opening of Item 1 of the 10-K received Mar 3, 2026

We are a clinical-stage biopharmaceutical company focused on developing therapeutics for serious illnesses driven by inflammatory and immunologic processes and direct cellular damage. Our product candidates target calcium release-activated calcium ("CRAC") channels and, if approved, would represent a new class of therapeutics. Clinical and preclinical data suggest that inhibition of CRAC channels may have therapeutic potential through a dual mechanism involving modulation of inflammatory signaling and protection of tissue cells from calcium-mediated injury.
