Business, in the company's words

opening of Item 1 of the 10-K received Mar 19, 2026

Eledon is a clinical stage biotechnology company using our immunology expertise in targeting the CD40 Ligand ("CD40L") pathway to develop therapies to protect transplanted organs and prevent rejection, and to treat amyotrophic lateral sclerosis ("ALS"). Our lead compound in development is tegoprubart, an IgG1, anti-CD40L antibody with high affinity for the CD40L, a well-validated biological target that we believe has broad therapeutic potential. We believe the central role of CD40L signaling in both adaptive and innate immune cell activation and function positions it as an attractive target for non-lymphocyte depleting, immunomodulatory therapeutic intervention.
