Business, in the company's words

opening of Item 1 of the 10-K received Feb 26, 2026

Over the past decade, the technology industry has been undergoing a massive transition from on-premises hardware and software that customers buy, to services in the cloud that they rent. Organizations find themselves at different points in this transition to the cloud. Regardless of where organizations are in their transition, they all face a common set of challenges: they exist in a complex, heterogeneous infrastructure environment which exacerbates the fundamental problems of the Internet more than ever, and the on-premises hardware boxes that they once relied upon to solve these problems were never designed to work in such an environment.
