Business, in the company's words

opening of Item 1 of the 10-K received Mar 17, 2026

Cibus is a leading agricultural biotechnology company that primarily uses proprietary gene editing technologies to develop plant traits, which are specific genetic characteristics in the DNA of a plant's seed. Plant traits, or characteristics, influence how a resulting plant functions and/or interacts with its environment. Cibus produces these edited plant traits by a unique process that is endeavoring to change the scale and speed of plant breeding for many major agricultural crops. Over the course of its history, Cibus has developed a proprietary time bound and predictable gene editing platform referred to as the Rapid Trait Development System? (RTDS®).
