Business, in the company's words

opening of Item 1 of the 10-K received Mar 26, 2026

We are a pioneering diagnostics technology company. Our mission is to expand access to novel molecular diagnostic testing, most immediately in the transplanted organ rejection testing category. We are developing molecular diagnostic test kits designed to empower our customers to run their own tests in-house to participate in the patient-care value chain, which is counter-positioned with the send-out-testing central laboratory model. Our decentralized approach also puts testing in the hands of researchers to enable more studies, which we believe can improve standards of care while also creating demand for more testing.
