Sector percentile at each rescan, stronger toward the top; facts filed by each date only.

Business, in the company's words

opening of Item 1 of the 10-K received Mar 4, 2026

Our mission is to build the world's most powerful computers to help solve humanity's most important and pressing problems. Our strategy is to be at the forefront of superconducting quantum computing. Classical computers are plateauing, Moore's law has slowed, returns for parallelization are diminishing and energy requirements can't keep up. Today, many of the world's most important computational challenges remain intractable, lying beyond the capabilities of traditional supercomputers and cloud infrastructure. We build and operate quantum computers. We believe quantum computing represents one of the most transformative emerging capabilities in the world today.
