Sector percentile at each rescan, stronger toward the top; facts filed by each date only.

Business, in the company's words

opening of Item 1 of the 10-K received Mar 17, 2026

GitLab is the intelligent orchestration platform for DevSecOps, where software teams and their Artificial Intelligence ("AI") agents stay in flow to ship software faster. Built with a unified data model, our platform brings together development, operations, Information Technology ("IT"), security, and business teams across the entire software development lifecycle to deliver better, more secure software faster. AI has accelerated individual coding, but teams lose momentum coordinating across planning, testing, security, deployment, and operations. Fragmented toolchains and tool-specific AI agents create bottlenecks that slow software delivery.
