Business, in the company's words

opening of Item 1 of the 10-K received Feb 27, 2026

We cannot predict if metals prices will rise or fall in the future. Extended significant future declines in metals prices, particularly copper, could have a material adverse impact on our results of operations, financial condition and value of our assets. Under very adverse market conditions, we might consider curtailing or modifying some of our mining and processing operations. We may be unable to decrease our costs in an amount sufficient to offset reductions in revenues, in which case, we may incur losses, which may be material. Declines in the prices of metals we sell could also result in metals inventory adjustments and impairment charges for our long-lived assets.
