Business, in the company's words

opening of Item 1 of the 10-K received Mar 5, 2026

BBOT is a clinical-stage biotechnology company with the mission of transforming the lives of patients with cancers driven by RAS and PI3K?, the two most frequently mutated oncogenes. Aberrant RAS signaling drives uncontrolled tumor growth in some of the deadliest cancers, including lung, breast, pancreas and colon cancer. This can come from mutations in RAS itself, which underlie approximately 30% of all human cancers, or from RAS-mediated overactivation of PI3K?. Our goal is to provide meaningful benefit to patients by designing and developing new therapies to achieve high levels of target inhibition against these oncogenic drivers while maintaining a favorable tolerability profile.
